## About Wellmark

**Wellmark Technologies** is an Information Technology Company specialized in Network & Network Security Products, Solutions and Services. Our Services include IT Infrastructure Design, Implementation and Support. Wellmark supports enterprises and organizations of various sizes and of diverse fields like Education, Government, Engineering, Pharmaceuticals and IT. We are offering the highest degree of availability, scalability, manageability and security for the IT requirements of customer. Range of our services covers all the fields of Information Technology which are prevalent in conventional and non-conventional business ventures.

We understand both IT field and requirement of the IT in the business so the focus is always for the advantages of the customer. This means integration of the available hardware/software infrastructure, unbiased evaluation of components based on application rather than vendor preference and competent consulting. We believe in State-of-the-art solution and provide it in most economical way to customer – This is our business!!!!!!

## Wellmark Philosophy

We firmly believe that our success is directly linked to how much we contribute to achieve business objectives of customer, today and in the future. We ensure our solutions have the potential to maximize customer's profitability and minimize the time on IT operations. We maintain strong quality assurance program, with the emphasis on product performance and reliability.

## Business Challenges and Wellmark

To excel in competitive markets and rapid advancements in technology, coping up with internal barriers such as unreliable software, legacy applications, lack of expertise, resource shortages and information deficiencies- everything seems to require immediate attention for any business to survive! That is why, we are here for you! Our satisfaction stems from adequately fulfilling your information technology needs. Whether you are striving to stay ahead of the competition, building your strategic system that requires development, deployment and management, or extending the capabilities of your existing system; we keep our team equipped with latest IT tools and knowhow for benefit of your business.

Integrated Business IT Services are designed with focus on efficiency improvement at optimal cost. This comprehensive integrated set of services encompasses everything; from broadband connection to complex turn-key IT projects. Our objective is **“Use your strength on your core business, and leave your IT worries on Wellmark”**

**WELLMARK**  
Technologies

**Authorized Partner of:**

## Network Infrastructure

### Structure Cabling

Structure Cabling is set of cabling and connectivity that integrates the voice, data & video which is basic need for any kind of organization like Small to Enterprise. Structure Cabling is backbone on which we are going to build our complete IT Infrastructure.

### Switches

Switch is first & most important device for any kind of network. We need at least Gigabit Ethernet Switching Solution to run today's heavy bandwidth applications like video streaming, video conferencing, IP Surveillance etc.

We deal in unmanaged, Smart (Web manage), L2 & L3 Managed Switches.

### Routers

Router is heart of any network and it connects our internal network with external world.

We deal in Cisco & Juniper router to meet small to enterprise business requirement.

### **Infrastructure Management Service (IMS)**

We design IMS to manage & operate your complete IT Infrastructure as per your requirement. IMS includes on-site as well as Remote Support to accommodate your requirement.

### **Documentation**

A Document providing snap shot of your IT Infrastructure is important for inventory, operation and future expansion planning. Proper documentation also reduces dependencies, induction of new workforce and quick adaptability of existing staff to new network operations.

### **Corporate Training**

Wellmark intends to understand your network infrastructure and prepare a course plan specifically for your resources, technology and routine troubles. A training based on tailor-made course for your staff will provide in-house competency, reduced down time and ultimately improved performance of your resources. Wellmark will provide such training at your or our premises on similar IT setup, which will give hands-on experience and troubleshooting exercise on resembling setup and troubles.

### **Rental Services**

- Network Devices – Router/Switch/Firewall on rental basis
- Online Cisco Lab with 15+ Devices for Cisco Certification like CCNA, CCNP & CCIE
- Network Printing Services
- Telecommunication Services – Leased Line/MPLS VPN
